

Isabel Cristina Tobón Ph.D.

Professor at the Department of Architecture at Pontificia Universidad Javeriana. Doctor on Social and Human Sciences, Master in Environmental Management, Architect. She has participated in various scientific events on socio-environmental conflicts, territorial disputes, social movements, and various approaches to public space. She is deeply involved with the social inhabitants of the northern part of the Cauca, who are fighting in defense of their territories for autonomy and freedom.

Andrés Nieto MSc.

Professor at the Design Department at Pontificia Universidad Javeriana. Electronic Engineer, Master in Electronic Engineering. He has participated in projects involving robotics and the development of mobile applications in educational environments for the appropriation of the territory by the community.

Carlos Torres Ph.D.

Professor at the Design Department of the Pontifical Javeriana University. Doctor on Social and Human Sciences, Master in Communication and Industrial Designer. He has participated in several projects related to digital design, especially on mobile applications and video games. He is interested in exploring how digital media, like Mi Fink, can make us reflect on social issues.
